PROJECTS

SehatHub, Online Pharmacy Management System | DBMS semester project
Python, Flask, MySQL, HTML, Tailwind CSS, JavaScript, Chart.js | *GitHub* | *Demo video*

- Built four user roles (Customer, Pharmacist, Admin, Delivery) with role-based access on every route
- Built the customer flow: search and filters, cart, Cash on Delivery checkout and live order tracking
- Added prescription upload with pharmacist approval, and stock management with low-stock alerts
- Created an admin dashboard with Chart.js sales analytics and user management
- Designed a normalized MySQL database with 16+ tables
- Secured with bcrypt, parameterized SQL, CSRF tokens, rate limiting with account lockout, secure cookies
- Added an AI chatbot using the Groq API

AURA Restaurant App | University project
React Native (Expo), Express.js, MongoDB, JWT | *GitHub* | *Demo video*

- Customer and Manager roles with secure login (JWT, hashed passwords)
- Menu, cart with promo codes, order status updates every 10 seconds
- Table reservation by date and time, double booking is blocked
- REST API with 26 endpoints, tested with Postman
